

# Allen Street Bicycle Boulevard

Bloomington's First Bicycle Boulevard

## What are Bicycle Boulevards?

Bicycle boulevards are low-volume and low-speed streets that have been optimized for bicycle travel through treatments such as traffic calming and traffic reduction, signage and pavement markings, and intersection crossing treatments.

## Why Allen Street?

The Allen Street corridor is identified in the City's Greenways Plan as a highly desirable biking route connecting west and east side neighborhoods to such destinations as the B-Line Trail, Bryan Park, and the City's future park on the McDoel Switchyard property.

## Where will it go?

The first phase of the Allen Street Bicycle Boulevard will connect Walnut Street to Bryan Park. The full Allen Street Bicycle Boulevard will extend from Patterson Drive to College Mall Road.

## What will it look like?

Specific design features have not been decided. Bicycle boulevards vary greatly in their individual design elements. This flyer provides some examples of designs that have been used in other cities.

## For more information:

Contact the City of Bloomington Planning Department at (812) 349-3423, or Public Works at (812) 349-3410.
