

ImagineBloomington Workshop 7: Tri-North Middle School (3/27/2012)

Survey General Comments

- I think it is a great idea to involve the community in creating the future of Bloomington. The question is who has the most influence to create the vision and implement the ideas.
- I have participated in the previous GPP processes and the zoning ordinance. After that process, I felt that there was more of a generic zoning ordinance than one that was drawn from the GPP.
- Maintain and increase social mixture – avoid large clusters of people of the same social make-up – e.g. low income vs. large income, student vs. town.
- Design regulations need to support green designs more strongly.
- Very concerned about the hospital moving out of the city.
- I just want less suburbs. The average distance between two points for a cyclist should be no more than $\sqrt{2}$ (bird distance).
- Mostly here as an observer.
