

BDU / Technology Infrastructure Advisory Committee

Meeting Date: Sept 13, 2012, 4PM

Location: Bloomington City Hall Hooker Room

Board Attendance: Matt Davy, Dennis Cromwell

Staff Attendance: Rick Dietz

Guest Attendance: None

Rick Dietz reported on CoB activities: Gig.U, Code for America, Google Summer of Code, etc. as well as Bloomington Certified Technology Park CTP process. Greater opportunities for public and BTC involvement are forthcoming as we enter the charrette phase.

Dennis Cromwell is interested in a meeting of UITs and CoB ITS staff. Need to pick topics before proceeding.

Matt Davy updated on activities surrounding openflow and software-defined networking. IU will have the only openflow conformance testing lab. This puts IU in a pivotal position in this area. Summer of Networking is coming to a successful close and 2013 planning is starting. Davy wants to start a SDN users group.

Next meeting with more members present will focus on big picture questions:

- * looking ahead, identifying trends and planning
- * growing local IT talent
- * getting ahead of changing technology trends
- * where can and should we be in 2-3 years?

Next Meeting will be scheduled for 10/4/12.
