SYNOPSIS

This ordinance rezones 100.859 acres from RE, RL, RH, to RS/PUD and grants outline plan approval. The outline plan is approved in two alternatives, one with a 12 acre school site, one without the school site. This development will consist of attached housing in duplex and fourplex building as well as single family houses. Total number of housing units will be 314 with the school site and 306 without the school site.

Recommended Conditions of Approval

1. Outline plan is schematic in nature. It is not to be construed as a commitment by the city to the exact street geometry and building location.
2. Development will conform to required street setbacks. Internal drive will be set back and screened from 10th Street.
3. Street to Haeberle subdivision will be deleted. A separate street connection to Russell Road will be required.
4. Russell Road right-of-way dedication and sidewalk will be provided across school site frontage.
5. Additional right-of-way dedication required for 10th Street realignment.
6. Plan Commission retains discretion to further review and refine erosion and siltation controls with development plan approval. Development plan shall include phasing program in which limited areas will be disturbed then immediately stabilized with construction and erosion/siltation controls before the next phase is disturbed.
7. No stripping, grading or tree removal shall take place without development plan approval.
8. Internal streets serving condominiums will be private; Plan Commission will determine status of street serving school site and single residences along north side of site during development plan review.
9. Specific alignment of Russell Road -- 10th Street intersection will be determined in development plan review.
10. Development is subject to RS dwelling unit occupancy regulations.
11. Development along the north property line where the site interfaces with Rachels Glen subdivision will be limited to RE single family development density. (40,000 sq. ft. single family lots.) This results in an overall maximum site density of 314 units with the school site, and 306 units without the school site.
