# TOBACCO REGULATION

Great news! Today, the House of Representatives **passed the Family Smoking Prevention and Tobacco Control Act** with a strong, bipartisan vote of 298-112.

Soon, we will be moving on to the United States Senate. As you may know, time ran out last year before the Senate could vote, but this year we have additional time and **we have a president who will sign the bill into law**. A good scenario for an historic victory, but it isn't going to be a slam dunk.

We will be in touch in a few days to let you know how your representative voted and how you can help with the effort in the Senate, but for now please enjoy this moment with us!

It is because of you and the thousands of calls and emails generated by advocates across the country that we can celebrate this victory today.

Thank you,

A handwritten signature in cursive script that reads "Brian".
