#### SYNOPSIS

This ordinance makes several year-end budget adjustments to eliminate projected shortfalls in salary and fringe line items. The projected shortfalls in the salary accounts relate primarily to the reclassification of seasonal and temporary positions from the status of independent contractor to employee.

The salary appropriation in the Police Department relates to additional overtime in the OWI program and other grant programs. The additional appropriation will be offset by grant funds.

The FICA and PERF appropriations in the Police and Fire Departments correct a budget oversight. In 1991, fringe accounts such as FICA and PERF were included in the Public Works budget for all departments. In order to provide a more accurate cost accounting of a department's total budget, it was determined to budget fringe accounts in each department's budget. Because sworn Police and Fire officers do not participate in either the Social Security system or the Public Employees Retirement Fund, no FICA or PERF appropriations were included for those departments. As a result, no FICA and PERF contributions were budgeted for the civilian Police and Fire employees, who are participants.

The appropriation to the Telecommunication Council will allow BCAT to acquire a satellite dish that will greatly increase the number of programs available on their channel.
