SYNOPSIS

Petitioners (Shady Acres Dev.) propose to continue their manufactured home development at 708 Cory Lane. The original application for this phase of development was for a straight RL subdivision. However the petition has been amended to an RL/PUD to incorporate smaller setback requirements. The project will contain 76 lots for manufactured homes.

MARCH 20, 1989

Requested is approval for a continuation of construction in the Shady Acres manufactured home development at 708 Cory Lane. The initial phase of construction was approved as a planned mobile home park. However the petitioners have installed only manufactured homes on the property. They propose to continue the same format of development and use only conforming manufactured homes on the entire project. For this reason the current request is not for a planned mobile home park.

The original application for this phase of development was for a straight RL subdivision. However the petition was been ammended to a RL/PUD and that is what the Commission will now consider. The petition was changed due to setback problems. Normal RL setbacks restricted the developable area on the proposed lots due to the format of the project. The original phase was approved with smaller than standard RL setbacks and the petitioners propose to continue the same style of development.

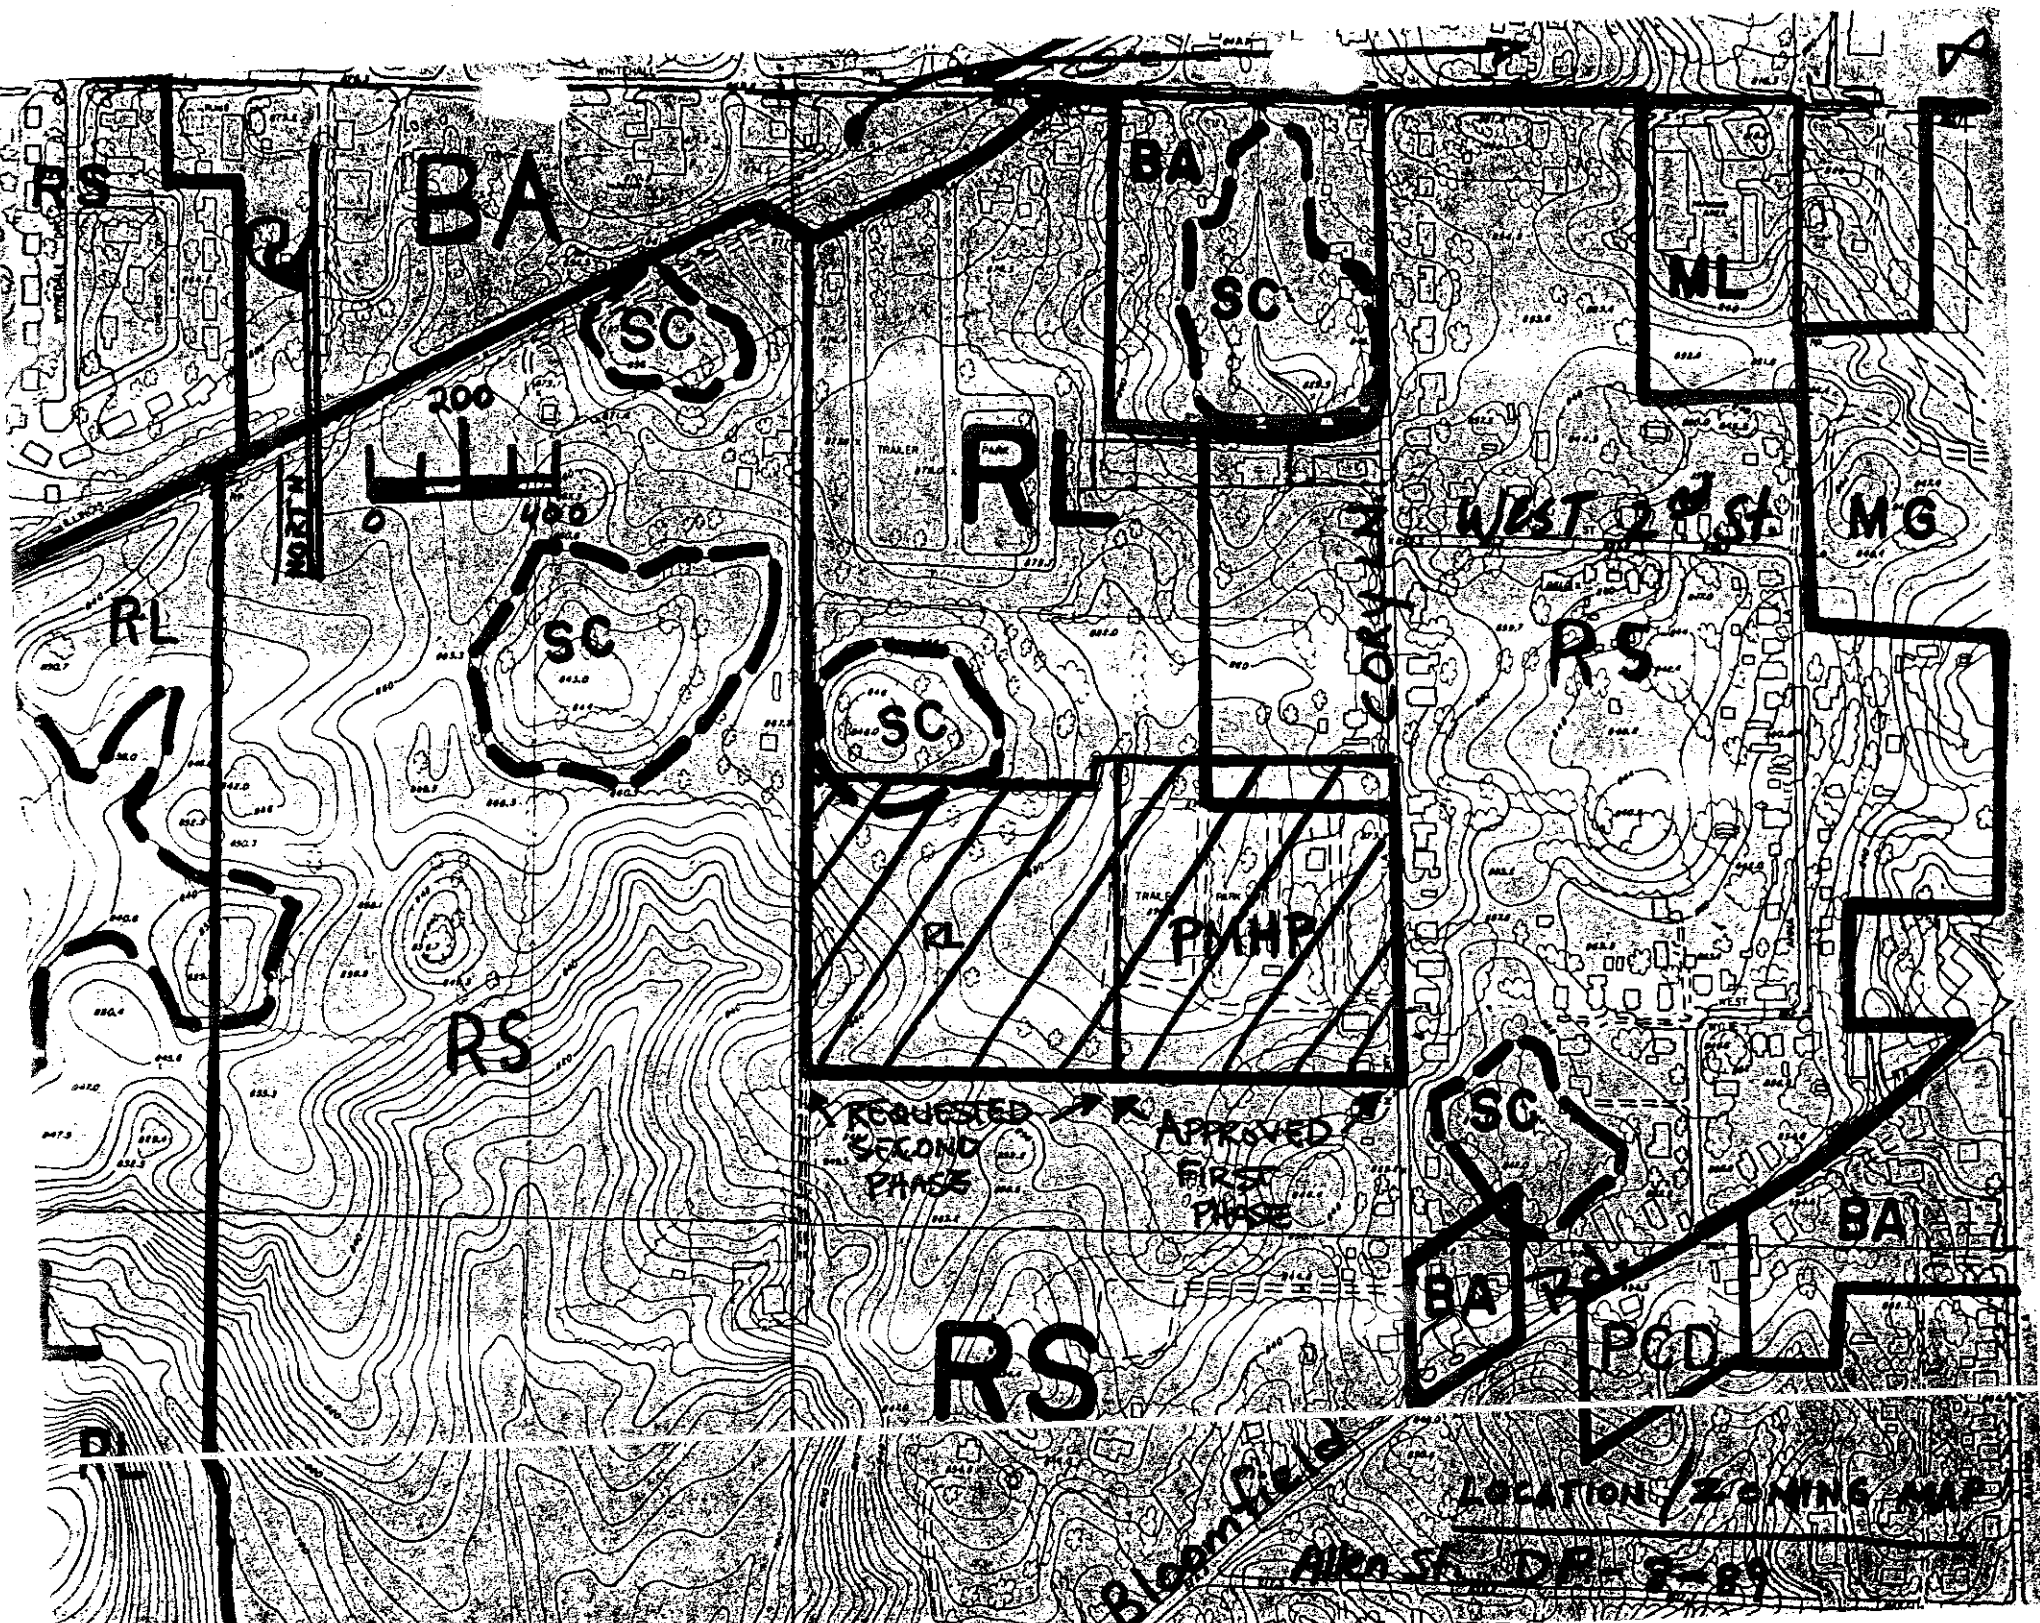

Requested now is outline and development plan approval for this RL/PUD. The project will contain 76 lots for manufactured homes. The petitioner will retain ownership of the lots but the homes will be individually owned. A public standard road within a 60ft. ROW will be constructed for major circulation through the project and stubbed at the property line. This street will remain private for now but with the potential for later dedication. Other roads within the development will be private and constructed with a minimum 24ft. of pavement curb, gutter, and sidewalks. Setbacks for this project are the same as was approved for the first phase of this project; 40ft. from centerline of the main street, 10ft. from property line on all other streets, 20 minimum rearyards and 8ft. minimum sideyards on all lots.

Stormwater detention will be accomplished on-site in the NW corner of the property. Petitioner has been working with the Engineering Dept. however plans have yet to be fully engineered.

Public sewer and water service will be provided to the project. Petitioners have been working with Utilities Dept. in regards to service plans.

Petitioners had requested both outline and development plan approval at this meeting. However complete engineered plans have not yet been finalized and approved. For this reason Staff recommends that the Commission approve only the outline plan aspect of this request at this time. The outlin plan approval should stipulate that stormwater drainage plans and the exact geometric layout of the public street be subject to City Engineering Dept. approval. This will allow the outline plan to go on to the City Council for their required approval while final engineering details are worked out. The development plan aspect of the request should be continued to the April

3rd. meeting for final hearing.
