Conditions of Approval imposed by Plan Commission on March 2, 1987:

- 1. List of uses as ammended by staff.
- 2. Areas of steep slopes (over 15% grade) are not to be developed without approval of Development Plan including detailed grading plan. This plan must incorporate a design that adopts any proposed buildings to the topography of the site without excessive tree clearance and cut or fill requirements.
- 3. The dimensional and building and parking setback requirements applicable in the ML zone shall apply to this development for each individual building site.
- 4. Details of intrastructure improvements will be deferred to development plan stage. (Internal road ROW and standards, utility placement, storm water detention).
- 5. This approval also includes subdivision of the 20 acre parcel with house from the 86 acre tract.
- 6. 40' from centerline ROW dedication will be required along Vernal except for the subdivided tract with the house. A 40' drainage and utility easemet will be required now along the subdivided tract with house. Future development of this 20 acres will require the full ROW dedication.
- 7. Only access to the project will be via a proposed road. One problem with the ML zone is that it includes a wide range of business uses both retail and commercial. Although the staff is supportive of industrial development, Vernal Pike is not viewed as an appropriate place for commercial strip development due to the characteristics of the road. Because of this the petitioner has proposed in addition to their prior committment they would be allowed to do things ONLY in adjunction with industrial uses.
- 8. Letter from Plan Commission to appropriate authorities urging cooperation with petitioner making road improvements; including possible use of Westside Industrial Funds.
