Cc: Jonathan Hoppe <jonathan.hoppe@bloomington.in.gov>

All,

I received a phone call earlier this afternoon from a woman named Becky Gavin. She called wanting to make sure the Chief received the following message. She told me that last night, her husband, Mr. Gavin, left home. She was especially concerned for his safety due to the fact that he has been diagnosed with early stage frontotemporal dementia. She informed me that her husband was located in Martinsville, and that she was incredibly grateful that Officer Hoppe drove her to Martinsville where her husband was located. She stated that she was in distress at the situation, and that Officer Hoppe's service was invaluable in achieving the goal of getting her husband home safely. She also noted that Officer Hoppe demonstrated genuine concern for their situation by suggesting that Mr. Gavin be tested for driving capabilities and gave further suggestions to prevent the situation from repeating itself. Becky insisted that the Chief be made aware of her gratitude for what she described to be remarkable service performed by Officer Hoppe last night.

MIH

MIH "WINS"

In conjunction with BPD, the county Health Department, the MIH's permanent car seat fitting station held its first event where over 10+ carseats in a two hour period.

The MIH team assisted a medically fragile patient that was facing homelessness and was being financially exploited. MIH team worked with the social security office, as well as investigators to retain financial autonomy and secure housing while attending to the patient's medical needs.

The MIH Team conducted a community training on AED, CPR, and 'Stop the Bleed.'

The MIH team received a patient referral from BPD's DRO for a medical assessment. During the team's visit, the patient had a seizure and MIH arranged for ambulance transport. Hospital staff alerted the team that the patient had a brain bleed and without the interventions, the patient would not have survived.
