

INDIANA UNIVERSITY

POLICE DEPARTMENT

Proposal to Upgrade Recording System

25 April 2018 Jeff Schemmer Communications Manager

The Public Safety Communication Center – Bloomington (PSCC-BL) is a Public Safety Answering Point (PSAP) located in Monroe County, operated by the Indiana University Police Department (IUPD). PSCC-BL uses recording hardware and software to record public safety radio traffic and phone lines used in the PSAP. That system was purchased by Monroe County for \$33,040 in April 2007 using money from the 911 Fund. Since then annual maintenance has been paid using money from the 911 Fund when IU has presented the bill to Monroe County.

The recording hardware and software have reached end of life and are in need of replacement. The replacement system would ensure that PSCC-BL is operating with modern hardware and software to record emergency and non-emergency telephone calls for service and radio traffic associated with those calls. PSCC-BL serves as a backup PSAP for the Monroe County Central Emergency Dispatch Center MCCEDC, and, as such, funding this equipment would ensure that the MCCEDC backup site was equipped with an adequate recording solution.

Indiana University would like to to continue using hardware and software provided by Word Systems and has obtained a quote to procure the necessary hardware and software. The base cost of the system is based on total number of resources that need to be recorded and IUPD has scoped the system to only include capacity necessary to record existing resources, but also, ensure that capacity can be scaled in the future, at additional cost, to meet operational needs.

There is some flexibility in terms of paying for maintenance of the system. One year of maintenance is included with the purchase of the system. Additional maintenance may be purchased either annually or as multiple years of maintenance paid in advance. If two years of maintenance is paid annually the cost is 20% of the overall system cost. If maintenance is paid for two years at a time the cost is 18% of overall system cost, three years at a time the cost is 16% of overall system cost, and, four years at a time is 14% of the overall system cost.

Indiana University proposes that Monroe County provide money from the 911 fund to replace the existing audio recording equipment using one of two purchase scenarios outlined below

Scenario 1 – System + 4 years pre-paid maintenance	Cost
48 Channel System Only	\$42,890
4 Years Pre-Paid Maintenance (addition to included maint. 5 years total)	\$21,778
Total Cost, paid year 1	\$64,668
Scenario 2 – System with maintenance paid annually starting year 2	Cost
48 Channel System Only	\$42,890
Year 1 Sub-total	\$42,890
1 Year of Maintenance Paid Annually Starting Year 2	\$7,778/yr
Maintenance Sub-total Years 2-5	\$31,112
Total Cost	\$74,002
