MEMORANDUM FOR TREE REMOVAL

DELTA DELTA DELTA - INDIANA

STATEMENT FOR DDD TREE REMOVAL

Dear Sirs:

We are writing for permission to remove two trees at the property address 818 E. 3rd Street. This house is owned by Delta Delta Delta Sorority and is currently occupied by the Delta Epsilon Phi Sorority.

There are two large trees in the front of the house that are diseased and dangerous. One is very close to the front of the house, and the other is in the front yard. We have had the trees inspected by Fowler Tree Service. They reported:

“It should be pretty straightforward as one is an ash tree that has already started falling apart from the emerald ash borer infestation, and the sugar maple tree is in decline also. These are both massive trees in high traffic locations that will kill somebody if they fall and someone is walking or driving by when it happens.”

We would like to contract to have these removed as soon as possible due to the safety issues and potential for property damage.

We appreciate your prompt review of this request.

Regards,
Cameo

RATING: NOTABLE	Survey: c. 1930, Neoclassical, beaux arts

Background: Courthouse Square Historic District

Request: New Signage

Guidelines: Courthouse Square Historic District Guidelines

- I. Guidelines for Signage and Awnings
 - A. Signage General
 1. Care should be taken with the attachment of signage to historic buildings.
 2. The scale of signage should be in proportion to the facade, respecting the building's size, scale and mass, height, and rhythms and sizes of windows and door openings.
 3. Obscuring historic building features such as cornices, gables, pilasters, or other decorative elements with new signs is discouraged.
 4. Use of materials such as wood, stone, iron, steel, glass, and aluminum is encouraged as historically appropriate to the building.

5. In situations where signage is directly attached to historic fabric, it should be installed in a manner which allows for updates and/or new tenant signage without additional drilling into stone, brick, or even mortar. If signage or signage parts must be attached directly to the building, it should be attached to wood or to mortar rather than directly into stone or brick. It is encouraged that signage be placed where signage has historically been located.
6. Signage which is out of scale, boxy or detracts from the historic facade is discouraged.
7. Care should be taken to conceal the mechanics of any kind from the public right of way.

Staff Recommends approval of COA 22-35

- The proposed sign would be located on the exact location of the previous sign.
- Staff would recommend that the "S" be shrunken to avoid covering some of the historic awning's decorative trim. However, this would change the whole sign design.
