

Research Committee Meeting – 12 April 2023, 9:30 a.m., 401 N Morton St Suite 234
Present - Ford, Michalek

Recap of the previous business

- START
 - Correspondence with HAND to look into housing situations and what may need to be addressed and possible recommendations for implementation
- Special committee event
 - Range of people who spoke out. Sentiment about community connections and how to resolve disconnect.
- Future research: Discussed going back to work done in past research with Byrd. Possibly look into an Independent research firm as recommended from the Denver model.
 - Need to bring more people in rather than the commission making final decisions. Goals should be to end the commission, bringing more funding towards task forces or collaborative groups. Bring those voices to a bigger table. Have them come together, finding a point of connection in building a community
- Personal research: officially started to recruit for the study. Planning to report it before the end of the year report.

Memorandum prepared by Shelby Ford
