This shed is in poor structural condition and requires extensive construction to make it a building again. Most contractors do not want to take on this kind of a job because a) the finished project will cost more than the building is worth and b) the building adds very little value to the property. It is too small to be used for its original purpose as a garage as cars are bigger now and it is too difficult to get in. Additionally, it has a dirt floor. While it is zoned "historic" as the late, great Bill Cook said, "Not all buildings that are old are historic", this is the perfect example. The owner

You may attend the meeting. If you attend, please note that all petitioners presenting a matter to the Board shall be limited to no more than five minutes to present their case and arguments. Additional time can be granted if deemed appropriate by the Board. It is not a life/safety issue and is only used for storing a few pieces of junk.

I got this file from Eric this morning to answer questions for someone at the front desk.

Property address: 910 S Dunn St.

Owner: John Mason

Agent Cheryl Underwood

Dee cycled this on November 7, 2016. Matt re-inspected on March 2, 2017, violations remained. Doris started Legal on April 4, 2017. Chris sent the Legal Letter on April 11, 2017- compliance date 4/25/2017. On April 21, an employee of Cheryl Underwood brought some required documentation to the Legal Department and got a receipt from Barb Toddy. Today she brought the same documentation to our front counter. The documents include a signed report from Kevin Potter, structural engineer, stating the garage on this property is not structurally sound. This document was required on the Cycle Inspection Report. I plan to inform the agent that the next step is to appeal for an extension of time to address the issues with the garage. That will leave only the exterior painting which has a November 7, 2017 deadline, as the only outstanding violation.

Hello,
I am contacting you to let you know that I received the structural engineer's report for the garage at this property. This report indicates that the garage is in need of further work to be structurally sound. I would like to recommend that you appeal to the Board of Housing Quality Appeals for an extension of time to make the repairs as defined in Kevin Potter's report. For this level of work, a building permit from the Monroe County Building Department will be required.

Please contact me if you have any further questions.

Dear Mr. John S. Mason,

The City of Bloomington Legal Department received a referral from the Department of Housing and Neighborhood Development ("HAND") concerning possible violations of the Bloomington Municipal Code (BMC), Title 16: Residential Rental Unit Inspection Program. The Title 16 Residential Rental Occupancy Permit for this property expired on August 9, 2016. Under BMC § 16.03.030 it is a violation for you to allow tenants to occupy this property without an occupancy permit from HAND. An occupancy permit cannot be issued until you correct all violations outlined in the Remaining Violation Inspection Report of March 7, 2017.

Please have the structural engineering report for the garage delivered to HAND no later than **April 25, 2017**. If the garage is not structurally sound, and if you need additional time in which to remedy that situation, then please file for an extension of time with the Board of Housing Quality Appeals by April 25, 2017. Otherwise the City may initiate an ordinance violation lawsuit. In that event, the City will seek fines up to \$2,500.00 per day for each day that the property is out of compliance dating back to August 9, 2016. Furthermore, the City may ask that the property be and remain vacated until and unless you bring the same into full compliance.

Your prompt attention to this matter is greatly appreciated.

Re: 910 South Dunn Street

Per your request, we recently performed a structural inspection for the detached garage building located at 910 South Dunn Street, Bloomington, IN. The results of this inspection are summarized as follows:

1. The garage building is 12 feet by 18 feet in area and is wood framed construction. The garage framing is bearing on small stone or block piers at the four corners. There is a large gap between the bottom of the framing and the ground along the South side and West side.
2. The foundation support piers are very inadequate. The piers have settled unevenly resulting in a slope to the structure. Also, the structure is sagging between the support piers.
3. The roof shingles are old and in poor condition. It appears that multiple shingle layers exist. Roof leaking appears to have been minimal.
4. The wood framing was found to be in good condition except for being skewed as a result of the uneven foundation settlement. The exterior has not been painted for some time.
5. Trees have grown very close to the garage including a very large tree against the west end of the south wall. A tree about 12 inches in diameter is rubbing against the roof edge near the east end of the north wall. There are two small trees close to the west wall.

RECOMMENDATIONS

The following work is recommended in order to correct the structural deficiencies in the garage.

- a. Install six support piers with one pier under each corner and one pier under the middle of the north and south walls. The piers would consist of a 24" x 24" x 8" concrete footing pad set below frost depth and 8" concrete block bearing on top of the footing and extending to the bottom of the garage framing. The piers would be set level in order to level the garage structure.
- b. A treated 2 x 10 band board would be installed along the bottom of the north, south, and west walls on the interior and would bear on top of the proposed concrete block piers. The band board should be continuous from pier to pier with no mid-span butt joints.
- c. The gap between the bottom of the siding and the ground should be covered with either a vinyl skirting or a treated plywood enclosure.
- d. All layers of roof shingles should be removed. Any poor decking boards should be replaced. A new shingle layer should be installed.
- e. The exterior should be painted in the near future.
- f. The trees as described are very close to the structure, but are not in conflict with the proposed foundation piers. The trees could remain for now, but may need to be removed in the future.

Please contact us if there are questions.

RE: 910 S. Dunn St., Bloomington, IN

Dear Mr. John S. Mason,

The City of Bloomington Legal Department received a referral from the Department of Housing and Neighborhood Development ("HAND") concerning possible violations of the Bloomington Municipal Code (BMC), Title 16: Residential Rental Unit Inspection Program. The Title 16 Residential Rental Occupancy Permit for this property expired on August 9, 2016. Under BMC § 16.03.030 it is a violation for you to allow tenants to occupy this property without an occupancy permit from HAND. An occupancy permit cannot be issued until you correct all violations outlined in the Remaining Violation Inspection Report of March 7, 2017.

Please have the structural engineering report for the garage delivered to HAND no later than **April 25, 2017**. If the garage is not structurally sound, and if you need additional time in which to remedy that situation, then please file for an extension of time with the Board of Housing Quality Appeals by April 25, 2017. Otherwise the City may initiate an ordinance violation lawsuit. In that event, the City will seek fines up to \$2,500.00 per day for each day that the property is out of compliance dating back to August 9, 2016. Furthermore, the City may ask that the property be and remain vacated until and unless you bring the same into full compliance.

Your prompt attention to this matter is greatly appreciated.

Sincerely,

Christopher J. Wheeler

There is no intention on my part for this home to become a rental or profitable business investment, only a way to possibly re-coop some of the housing cost when i sell the home after his graduation possibly in 2 years.
