SUMMARY

New construction of two mixed use buildings with Original Plat Lots 9 and 10 in historic district, northwest corner located within the local historic district.

COA-17-56

212 S. Grant St. (Greater Restaurant Row)
Petitioner: Annex Student Living

Contributing **105-055-34668** **Apartments; American Foursquare, c. 1927**

Background
This petition is part of a larger two building new construction development with the property, 212 S. Grant St (specifically 013-2680-01 ORIG PLAT (30’x66’) LOT 10 and 013-02680-00 ORIG PLAT LOTS 9 & 10 (47’x38’)) is located within the Greater Restaurant Row Local Historic District. The map to the left outlines the entire project scope in

cyanine and the area specifically under the BHPC’s purview is outlined in red. It is zoned Commercial Downtown (CD) and is in the University Village Downtown Overlay.

Request

This is a request to new construction of two mixed use buildings with Original Plat Lots 9 and 10 in historic district, northwest corner located within the local historic district. The

proposed building materials in this portion of the project are a mix of brick veneer, a storefront system, metal canopies over retail, and a metal railing for second floor outdoor space.

ALLEY

Applicable Design Guidelines or Standards Sections

Secretary of Interior's Standards for Rehabilitation:

Standard 9: "New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment."

Preservation Plan for Historic Bloomington 2012:

Restaurant Row Character Area

Committee Comments

- The architectural character in Restaurant Row is still recognizable as single family residential. The small footprints, with green space in front and hidden or separated parking areas, create an intimate and relaxing environment.
- Efforts should be made to ensure that development of these lots has orientation to Fourth Street, as well as compatible scale and character.

Strategies and Recommendations

- Maintain residential character and mass. In addition, ensure compatible redevelopment to the west.
- Retain the rhythm of residential window forms on the second story.
- Keep uniform setback from the street with green space.
- Deny demolition for higher density or height except in non-contributing structures.
- Retain public tree cover and preserve existing trees.

Unified Development Ordinance University Village Overlay District 20.03.150

The University Village Overlay (UVO) District is intended to guide both new development and redevelopment activities as follows:

- Ensure that new development is compatible in mass and scale with historic structures in the University Village Character Area;
- Draw upon the variety of architectural styles combined with diverse land uses and site features to enhance the existing eclectic mix of developments that serves as a dynamic and key transitional activity center that connects the Courthouse Square with Indiana University;
- Promote infill and redevelopment of sites using moderate residential densities for the University Village area and higher residential densities along the Kirkwood Corridor (Washington Street to Indiana Avenue);
- Maintain and reinforce the traditional main street character of the Kirkwood Corridor as a strong pedestrian-friendly route;
- Protect and maintain the unique character of the converted residential structures along Restaurant Row (4th Street between Lincoln Street and Dunn Street).

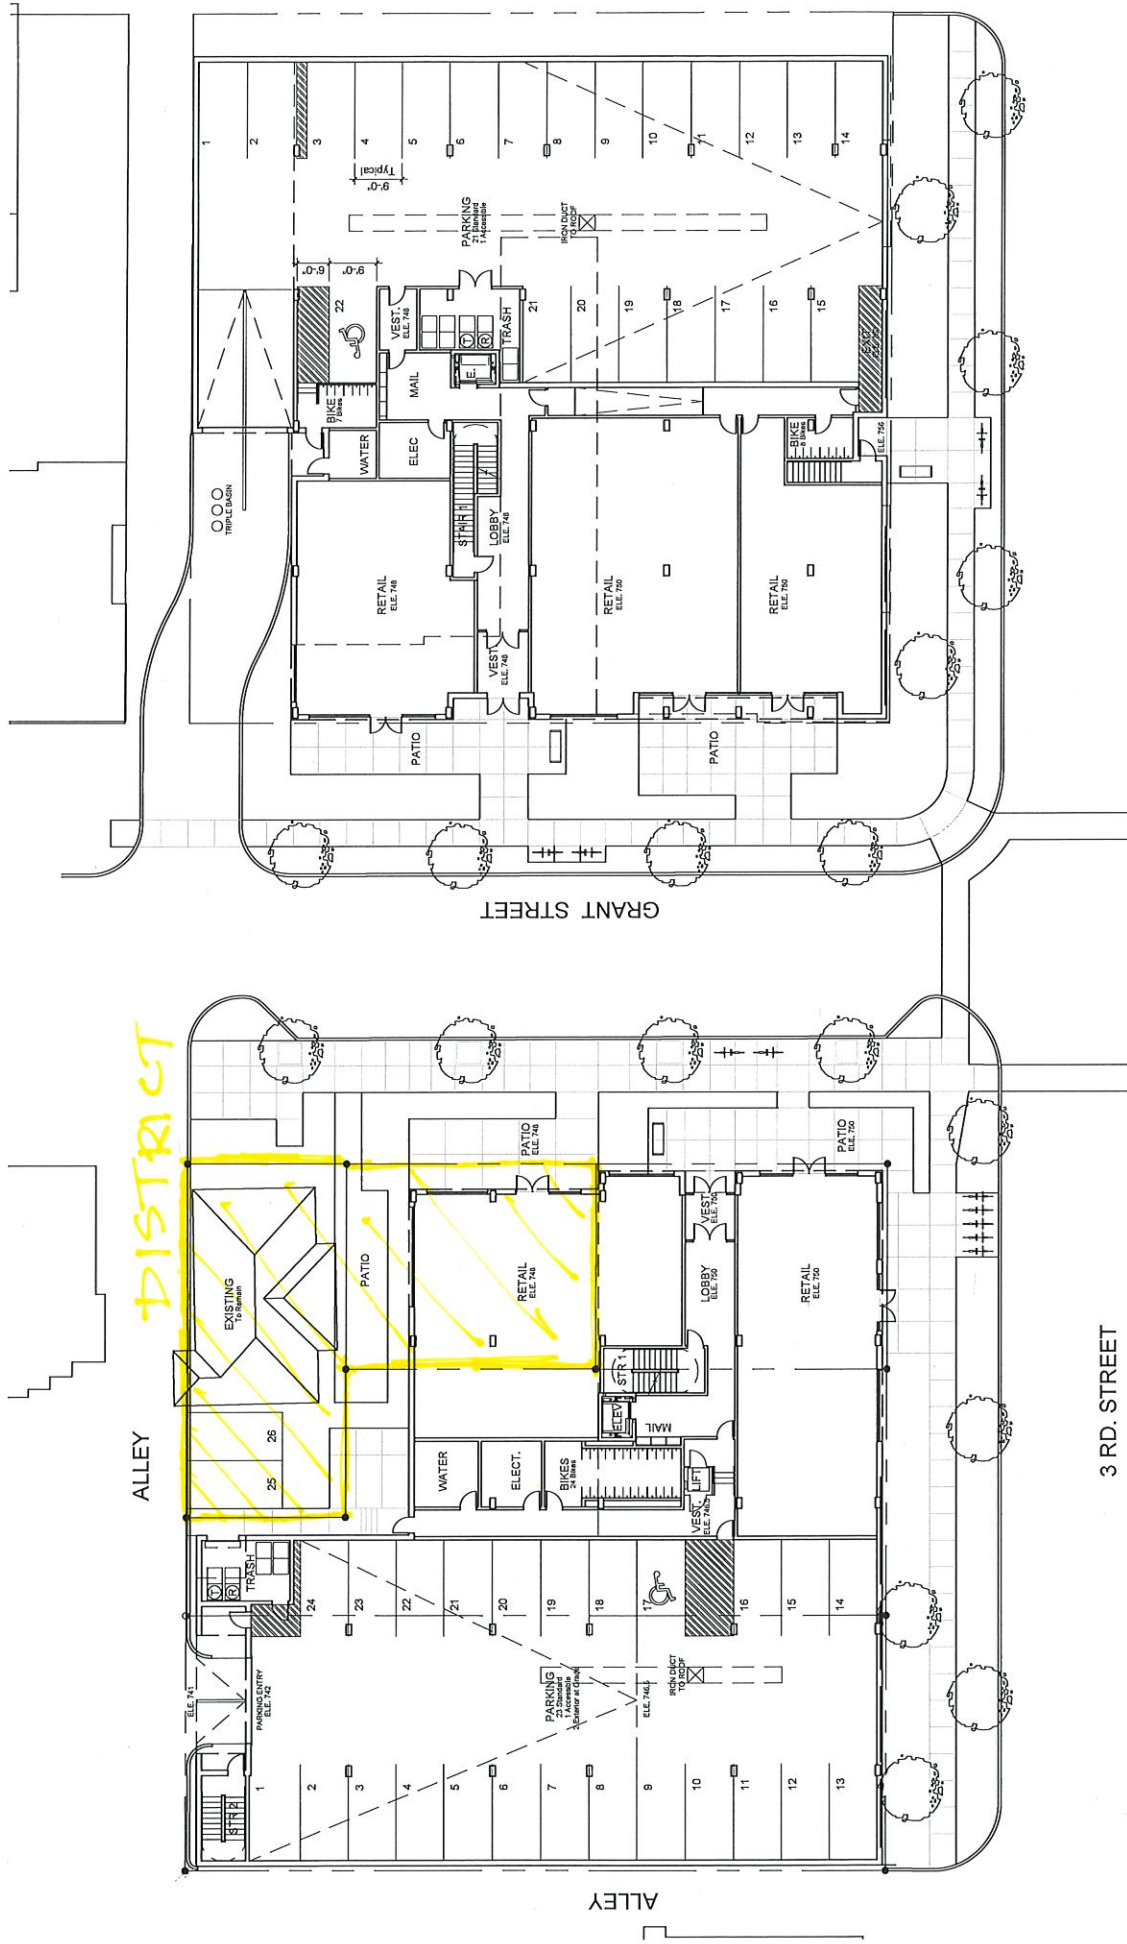

20.03.200 University Village Overlay (UVO); Architectural Standards

(b)(D) Restaurant Row: (i) Buildings shall incorporate sloped or pitched gable and/or hip roofs. (ii) Roof ridges greater than forty (40) feet in width parallel to a street shall incorporate a minimum of one (1) dormer into this section of sloping roof.

Recommendations

Standard 9 from the SOI Standards notes three important review considerations for new infill construction: “characteristics of the property, differentiation of the new work from the old, and compatibility with existing fabric in terms of materials, features, size, scale,

and proportions and massing.” Things to be considered in context with the rest of the historic district are how the new construction fits by site placement, height, massing, scale, materials, development patterns and architectural characteristics such as ornamentation and fenestration. The portion of the project in our purview meets the setback of the current house at 212 S. Grant and provides the feel of a residential front yard form to connect with the district. The height of the portion in the historic district does not overshadow the historic structure. The materials are compatible with the district’s overall character. Staff is recommending approval of this request regarding Original Plat Lots 9 and 10 within the Greater Restaurant Row Historic District.

APPLICATION FORM
CERTIFICATE OF APPROPRIATENESS

RECEIVED
AUG 01 2017
BY: Bme

Case Number: COA 17-56

Date Filed: 8/1/2017

Scheduled for Hearing: Aug. 10, 2017

Address of Historic Property: 212 Grant Street

Petitioner's Name: Annex of Bloomington LLC

Petitioner's Address: 409 Massachusetts Ave, Indianapolis, IN 46204

Phone Number/e-mail: 317-409-0554/ joy@annexstudentliving.com

Owner's Name: same as petitioner

Owner's Address: _____

Phone Number/e-mail: _____

Instructions to Petitioners

The petitioner must attend a preliminary meeting with staff of the Department of Housing and Neighborhood Development during which the petitioner will be advised as to the appropriateness of the request and the process of obtaining a Certificate of Appropriateness. The petitioner must file a "complete application" with Housing and Neighborhood Department Staff no later than the Wednesday before a scheduled regular meeting. The Historic Preservation Commission meets the second Thursday of each month at 5:00 P.M. in the McCloskey Room. The petitioner or his designee must attend the scheduled meeting in order to answer any questions or supply supporting material. You will be notified of the Commission's decision and a Certificate of Appropriateness will be issued to you. Copies of the Certificate must accompany any building permit application subsequently filed for the work described. If you feel uncertain of the merits of your petition, you also have the right to attend a preliminary hearing, which will allow you to discuss the proposal with the Commission before the hearing during which action is taken. Action on a filing must occur within thirty days of the filing date, unless a preliminary hearing is requested.

Please respond to the following questions and attach additional pages for photographs, drawings, surveys as requested.

A "Complete Application" consists of the following:

1. A legal description of the lot. See attached legal description.

2. A description of the nature of the proposed modifications or new construction:
Development of a new mixed use retail/ multi-family residential project located on northeast and northwest corner of Grant Street and 3rd Street. Existing structure at 212 Grant Street will remain.

3. A description of the materials used.
The following materials are proposed for the project and represented in the attached drawings:

Ground Floor: Brick veneer, aluminum/ glass storefront, pre-finished alum louvers, steel/ glass canopy
Upper levels: Metal wall panels, Fiber cement panels, brick veneer, vinyl windows, metal railings/ sunshades/ balconies, aluminum trim/ flashings.

See attached submittal documents for complete description of proposed materials.

4. Attach a drawing or provide a picture of the proposed modifications. You may use manufacturer's brochures if appropriate.

5. Include a scaled drawing, survey or geographic information system map showing the footprint of the existing structure and adjacent thoroughfares, Geographic Information System maps may be provided by staff if requested. Show this document to Planning Department Staff in order to ascertain whether variances or zoning actions are required.

6. Affix at least three photographs showing the existing full facade at each street frontage and the area of modification. If this petition is a proposal for construction of an entirely new structure or accessory building, include photographs of adjacent properties taken from the street exposure.

If this application is part of a further submittal to the Board of Zoning Appeals for a Conditional Use or development standard variance, please describe the use proposed and modification to the property which will result.

Petitioners Statement – Revised Submittal

Design Concept

The project seeks to re-develop the northeast and northwest corners of 3rd Street and Grant Street. The project site is located within the Commercial District (CD), adjacent to Restaurant Row (4th Street to the north) and also is part of the University Village Overlay District (UVO).

In considering the development of the existing site, consideration of existing grade and sub-surface soil conditions is a major factor and has influenced the revised design submittal. Each of the sites slope from southeast to northwest. The grade differential (low point to high point) is 15 ft on the east site and 10 ft on the west site.

The existing 2 story residential structure in the northeast corner of the west parcel is to remain and the petitioners may change the use of this structure to retail in the future. All other structures on both parcels are proposed to be removed to allow for the proposed development. Existing on street parking on Grant Street is proposed to remain. All existing curb cuts along Grant Street and 3rd Street are also proposed to be removed, with the exception of the existing alleys.

Urban Context

The proposed development is located in an area of the Bloomington community that adjoins a historic district of smaller residential style homes and is at the edge of the more commercial downtown district. Our vision and design intent with this project is to provide a building that is more in context with the larger scale buildings of the downtown community than those of Restaurant Row. The scale of a new development such as this is not the same as an older community but has incorporated some of the same uses as the older community.

In designing a larger mass adjacent to smaller residential style buildings to the north we have reduced the overall mass/ bulk of the proposed buildings so they would not dominate the backdrop or skyline when viewed from the surrounding neighborhood. The proposed materials and modulation of the façade breaks the composition of the building into smaller elements that relate to the scale of the surrounding structures.

We would expect that future developments to the south and west of this development will enhance the proposed development and continue to connect our site to the downtown core.

Buildings that have taken a similar approach to the use of more modern materials and forms in recent past can be found at the corner of 10th Street and N. College Ave, which incorporate brick with fiber cement siding and metal panels and more contemporary forms of architecture.

The surrounding context of architecture for the proposed site contains older buildings of a simpler, less complex style than the one proposed. However, history has to start before it is made and that this building will become a definition of quality modern architecture within the fabric of Bloomington over the next many decades. The materials selected for this project shall also withstand the test of time and maintain its integrity and style without showing signs of aging.

Vehicular Access

East Building

The proposed design provides for vehicular access to interior parking from Grant Street via the existing alley. The east building provides for a recessed garage entry and provides enclosed parking along the southern portion of the parcel. This parking will be almost entirely below grade and not visible from 3rd Street. Interior parking stalls along the south property line have been reduce from 9 ft to 8'-6". We feel this is acceptable in a controlled environment and with assigned parking. 1 handicapped space has also been provided and will be van accessible.

Interior Parking provided = 21 spaces

Exterior Parking provided = 0 spaces

West Building

The proposed design provides for access from the existing alley with traffic moving from Grant Street to the north. The entrance to the enclosed garage has been recessed to provide a normal drive aisle width in front of the entrance and to better facilitate vehicular turning in and out of the garage. We have also located 2 on grade parking stalls behind the existing 2 story structure. Again, the parking stalls along the north wall of the garage have been reduced from 9 ft to 8'-6" to allow for increased parking.

Interior Parking provided = 24 spaces

Exterior Parking provided = 2 spaces

Parking ratio: required: .6 required/bed
 Provided: .44 spaces/ bed

The project design is encouraging bike transportation due to its location and proximity to the downtown and Indiana University campus. Bike storage above the required minimum has been provided.

Annex currently operates 2 other apartment communities with of similar bed counts (118 and 134) and parking ratios of .51 and .54 spaces per bed and are operating without a demand for additional parking.

Non- Residential Space/ Retail

The proposed design has chosen to locate all primary retail space fronting along Grant Street. This choice is in response to the strong pedestrian activity found on 4th Street/ Restaurant Row and would be an extension of this vibrant activity area. The project has provided 4 separate retail spaces, 2 in each building, each with a proposed patio space designed to activate the right-of-way with social interaction of building occupants and visitors. We envision outside seating/ dining in this area and have indicated exterior lighting and trellis structures to accent this activity area. Access from the sidewalk is provided to each retail zone and will not require steps as the floor elevations along Grant Street change to accommodate the sloping sidewalk/ street grade.

A portion of the retail space in the East Building has been recessed in order to provide more useable patio space. Since the grade change on this side of Grant Street is more severe, this recessed storefront allows the patio to be separated from the sidewalk so that grading can be done without seat walls or structures in the right-of-way.

The portion of the West Building retail space that is located within the Historic District has been recessed to align with the front façade of the existing 2 story "contributing" structure. The overall height of the ground floor retail and terrace above with within the allowable height restrictions for adjacent structures to the Historic District

The ground floor of both buildings is proposed to be a brick veneer, red blend as indicated in the renderings. Openings in the façade are flat arches and walls are "capped" with cut limestone trim.

Trellis structures have been provided at 1 retail space in each building to provide shade, lighting of the patio space in the evening hours and architectural detail on the façade.

Windows have been located in the retail spaces facing Grant Street, 3rd Street and interior court or sidewalls where possible. Windows shall be pre-finished aluminum and glass storefronts of approximately 9 ft height and the total amount of glass on the Grant/ 3rd Street facades exceed the minimum requirement of 50% of the wall area (measured from floor to ceiling).

The proposed floor to floor height at the retail is a minimum of 13 ft to allow for the transfer of all residential systems above a 9 ft interior ceiling and for structural depth. Storefronts are proposed from floor to the 9 ft ceiling height.

Landscaping has been provided in the right-of-way to highlight the patio areas and provide proper foliage along the base of the proposed buildings. The exact planting materials are not indicated but will utilize approved materials and be scaled appropriately for screening solid portions of the building elevations and allowing for natural light to penetrate the storefront into the retail spaces.

The total amount of retail space provided is less than the required 50% of ground floor space. We do not feel this is achievable in order to provide the necessary parking and residential building access. In the East Building, no access is possible from 3rd street due to the steep existing grade. Also by providing parking and retail on the same level, we have been able to reduce the overall building height by 1 full story on each site.

Multi-Family Residential

The proposed development provides for 3 stories of residential units above the retail / parking podium. The project is below the allowable density for each parcel. Proposed floor to floor height is 10 ft so the overall height of the residential building will be 30 ft above the podium deck.

The residential entrances to both buildings are located along Grant Street and are recessed into the building façade. A steel/ glass canopy structure has been provided at each entrance for resident safety and as a design element.

The design concept for the upper level residential floors is to create a modulated façade by “pushing and pulling” the individual residential units and by interweaving the 2 primary materials – metal wall panels and fiber cement panels. Each façade is visually “broken” into segments or widths that are reflective of the residential style structures within the UDO on 4th Street. The 3rd Street façade takes on a “row house” appearance but with more contemporary maintenance free materials.

The metal wall panels anchor the building corners and weave/integrate with the secondary wall material – fiber cement panels. However, we have chosen to utilize 3 complimentary colors in the fiber cement panel design to provide a more interesting secondary surface that will take on a “blended” look overall.

The East Building provides for a “C or U” shaped floor plan of residential units above the podium. In response to the adjacent Historic District to the east, the east leg of the residential mass has been setback from Grant Street and from the east property line along the alley. This “step down” massing is consistent with the intent of the UDO design guidelines.

The West Building provides and “L” shaped floor plan of residential units above the podium. In response to the Historic District and the “contributing” structure to remain, the residential units facing Grant Street have been located outside of the Historic District that encroaches into the west parcel. The long leg of the residential floor plan is located as far away from the “contributing” structure but does not “step down” as required in the UDO design guidelines. The overall building mass is however very respectful of the existing “contributing” structure and complies with the intent of the guidelines.

Windows in the residential units will be vinyl, insulated units in sizes indicated on the plans and as required for egress requirements of the building code. The proposed design provides more than the minimum 20% of wall area for upper stories within the UDO. Windows will be tinted but not reflective for maximum energy performance.

The proposed design also includes the use of metal sun shades, Juliette balconies and metal trim to provide detail and ornamentation of the building exterior.

Signage for retail tenants and the residential buildings are indicated or implied on the drawings but will be submitted for separate review/ approval.

Roof Line Profile

The proposed design indicates a modulation of the facades on Grant Street and 3rd Street. As a part of this modulation we have also varied the height of the roof parapets on all elevations to further define the modulation of the individual elevations. The overall height of the parapets is a minimum of 2 ft and is as high as 6 ft, primarily at the building corners. The height of the parapets will aid in the screening of roof mounted mechanical equipment and roof penetrations.

The design utilizes a flat roof with internal roof drains in an effort to control the overall building height and is consistent with other commercial and residential buildings of similar size/ height in the downtown district.

Mechanical Equipment

Mechanical equipment shall be located on the roof of the residential buildings where possible and screened by the perimeter parapet walls of the exterior walls. Equipment shall be located in the center of the roof areas will not be visible from street level.

Exhaust fans for residential units shall be vented thru the roof or side walls with the exception of 3rd Street and Grant Street.

Bike Storage

Bike storage, Class I and II have been provided in the quantities required by the Development Standards and have been noted on the Site Plan and within the buildings.

The project will provide bicycle spaces above what is required per code in order to encourage residents to utilize bicycles as a main form of transportation in lieu of vehicular transportation to account for the reduction in vehicular parking spaces.

Sustainable Design

Sustainable design features of the proposed project shall include the following items:

- Green Roof systems on podium/ terraces
- White reflective single membrane roofing
- High efficiency rated mechanical equipment and appliances
- "Green" friendly building materials and locally supplied building materials
- Construction re-cycling to divert more than 50% of construction waste from entering landfills
- Increased window areas for daylighting of interior spaces
- Thermal performance of building enclosure above the minimum energy code requirements
- Project site is located within ¼ mile of public transportation
- LED lighting with automatic control

Right-of Way Encroachments

The following design elements encroach into the public right-of-way and will require the approval of the Board of Public Works;

- Concrete patios
- Bike racks
- Steel trellis/ canopies

Waivers

The following waivers are being requested along with any others that the Planning Department deems necessary to approve the proposed design:

1. Building Height
 - a. East Building - 48.5 ft in lieu of the required 40 ft above the lowest grade elevation to top of roof structure (actual height above grade at each corner indicated on the elevations)
 - b. West Building – 53 ft in lieu of the required 40 ft above the lowest grade elevation to the top of roof structure (actual height above grade at each corner indicated on the elevations)
2. Parking
 - a. East Building – 21 spaces in lieu of required 35 spaces
 - b. West Building – 24 spaces in lieu of required 29 spaces
3. Non-Residential Use
 - a. East Building – 32% of the ground floor is designated for non-residential use, excluding enclosed parking
 - b. West Building – 37% of the ground floor is designated for non-residential use, excluding enclosed parking
4. Building Height Step Down
 - a. West Building – North leg of the residential floors adjacent to the “contributing” structure and Historic District/ Restaurant Row UDO adjacent to the alley
5. Building Façade Module Offset
 - a. East Building – building façade modules on 3rd Street and Grant Street offset a depth of 12” and 18” in lieu of the required 3% of the building façade length (132 ft x 3% = 4 ft)
 - b. West Building – building façade modules on 3rd Street and Grant Street offset a depth of 12” and 18” in lieu of the required 3% of the building façade length (132 ft x 3% = 4 ft)

SUMMARY

Exploratory demolition involving removal of aluminum siding from 100 E. Kirkwood and 101-103 S. Walnut.

COA-17-57 and 58

100 E. Kirkwood Ave. and 105-111 S.
Walnut St.:
Courthouse Square
Petitioner: OEI, Inc.

Contributing, 105-055-23040, Commercial; 19th Century Commercial, c. 1890
Contributing, 105-055-23017, Commercial; 20th Century Commercial, c. 1900

These properties are separate buildings but one owner, 100 E. Kirkwood was built in c. 1890 and 105-111 S. Walnut was built in c. 1900, both have been severely altered, but are in good condition. These properties are located in the Courthouse Square Historic District. This is for exploratory demolition of the non-original aluminum siding for a project that will be reviewed at a later date. Staff is recommending approval.

Instructions to Petitioners

The petitioner must attend a preliminary meeting with staff of the Department of Housing and Neighborhood Development during which the petitioner will be advised as to the appropriateness of the request and the process of obtaining a Certificate of Appropriateness. The petitioner must file a "complete application" with Housing and Neighborhood Department Staff no later than the Wednesday before a scheduled regular meeting. The Historic Preservation Commission meets the second Thursday of each month at 5:00 P.M. in the McCloskey Room. The petitioner or his designee must attend the scheduled meeting in order to answer any questions or supply supporting material. You will be notified of the Commission's decision and a Certificate of Appropriateness will be issued to you. Copies of the Certificate must accompany any building permit application subsequently filed for the work described. If you feel uncertain of the merits of your petition, you also have the right to attend a preliminary hearing, which will allow you to discuss the proposal with the Commission before the hearing during which action is taken. Action on a filing must occur within thirty days of the filing date, unless a preliminary hearing is requested.

Please respond to the following questions and attach additional pages for photographs, drawings, surveys as requested.

A "Complete Application" consists of the following: 100 East 5th Street (Kirkwood Avenue)

1. A legal description of the lot. 013-33360-00 ORIGINAL PT LOT 124 (Northern Half of Buildings)

2. A description of the nature of the proposed modifications or new construction:
To remove aluminum siding and discover what is underneath to determine next steps for restoration and improvement of the facade and exterior coverings.

3. A description of the materials used.

4. Attach a drawing or provide a picture of the proposed modifications. You may use manufacturer's brochures if appropriate.

5. Include a scaled drawing, survey or geographic information system map showing the footprint of the existing structure and adjacent thoroughfares, Geographic Information System maps may be provided by staff if requested. Show this document to Planning Department Staff in order to ascertain whether variances or zoning actions are required.

6. Affix at least three photographs showing the existing full facade at each street frontage and the area of modification. If this petition is a proposal for construction of an entirely new structure or accessory building, include photographs of adjacent properties taken from the street exposure.

If this application is part of a further submittal to the Board of Zoning Appeals for a Conditional Use or development standard variance, please describe the use proposed and modification to the property which will result.

NORTH
 SITE PLAN AND RESTAURANT FLOOR PLAN
 SCALE 1/8"=1'-0"
 PLAN IS FOR GROUND FLOOR AND SECOND FLOOR

NORTH
 SECOND FLOOR LEVEL
 SCALE 1/8"=1'-0"

The earliest known photograph of 100 East Kirkwood building dates from the 1920's and shows a stucco finish on the north and west elevations. This was covered over with furring strips and aluminum siding to give its present appearance. A very small portion of this stucco, with a reddish finish, can be seen on a portion of the second floor east wall.

Comparing the photographs, it appears that the original window openings were preserved, along with the steel pipe guard rail for areaway. The north entrance and west wall sign board/canopy have been a fixture of the courthouse square since 1978. The interior of the restaurant is slightly older than the exterior signs and it has a nautical theme. The waitresses tell the tale that the "Walter's Fries" are named after the French fry cutter that was left behind by the previous restaurant owner.

The sheet metal coping of 100 E. Kirkwood appears to follow the original lines of the stucco shown in the historic photo. Seven of the 2 over 1 window sash and frames are still in place.

The Miller-Wohl Co. sign in the historic photo has the motto: "We say It With Value". The original storefront had large plate glass windows, electrical lights, and a canvas awning on the west side. A women's dress can be seen in one of the store front windows.

All of this has since disappeared under the wood siding and present signage. The thick wood entrance door has a loose chain for a pull, which has worn a groove into the wood from the numerous times the door has been opened by patrons of the restaurant.

This is a photograph of the Heat Service Co., Inc. truck parked outside of the main office located in one of the small shops of the South Walnut building.

Important details of the bay windows, wood framing, brick walls and stone trim can be seen in this photo.

Because this faces west, having canvas awnings provided sun control, sheltered pedestrians from rain, and provided additional advertising.

The South Walnut Street buildings storefront were built as a series of small shops as indicated on the Sanborn map. The four bay windows, centered over the original storefront doors and glass, are unique for Bloomington. Restrooms for the restaurant are behind the two bay windows on the left side of the photograph. It is possible to see some of the original bay window sash behind a cupboard door in the men's room.

This South Walnut shops include a door and stairway to gain access to the second floor of the building. There is a full basement, with the south third containing the steam boiler for the building. The concrete ramp was added in 2009 to provide handicapped access to the former Settle Jewelry store.

The south elevation faces the public alley. There is evidence of doors and windows that have been closed up or made smaller. Their original purpose is unknown. The short door provides access to the basement boiler room. The fire escape provides a second exit for the Trojan Horse bar. The very narrow space between the two buildings is taken up with electrical utilities and a kitchen exhaust duct from Michael's Uptown Café. The welded steel "jail door" limits access to this space.

The brick has several coats of paint, whereas the brick that is exposed on the east and west walls remains unpainted. The limestone infill below the storefront window replaces the original painted wood panels that are shown in the historic photograph. Limestone steps with railings provide access to the shops.

The south two storefronts still have the original roller mechanism in place for the long-lost canvas awnings. Because this building has steam heat, window glass has been removed to allow the installation of unit air conditioners.

SUMMARY

Amendment request to COA-16-66 and remove limestone wall on new construction and increase living wall component. Also, request to make changes to the entry point into the new construction addition.

COA-17-59

1008 S. Rogers
McDoel Gardens
Petitioner: Joseph Anderson

Contributing

105-055-53004

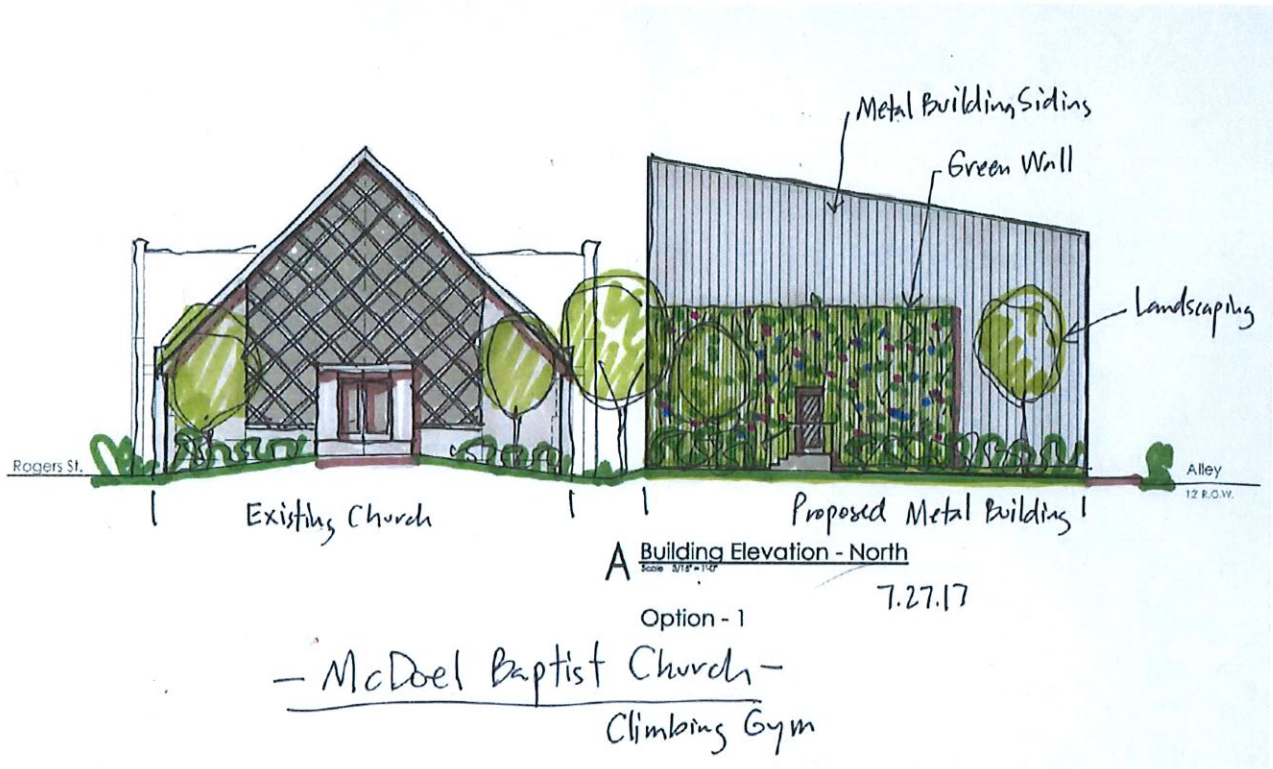

Church; Modern, c. 1925, 1965

This is a c. 1925 and 1965 slightly altered Modern church in good condition. The property is located in the McDoel Gardens historic district. This is a request for new construction of a 4,500 square foot commercial space. The new use for the church and new construction is as a rock climbing gym and that has dictated some of the new construction.

Previously approved design.

Proposed amendment.

The McDowell Gardens design guidelines state that addition should be placed where visibility from the street is minimized. This property is unique as it is a commercial space within a primarily residential neighborhood. This structure has also had additions and changes over time. This addition/new construction ties into the limestone, is set back from the primary structure and is slightly shorter than the primary structure. It is a nice continuation of contemporary architecture on this unique site. It will only be visible from the north side of the lot and does not obscure the historic structure. The primary materials are an Indiana limestone veneer in a split-faced pattern, a living wall and a dark bronze or black metal paneling.

Per the guidelines,

Materials

The contributing homes in the neighborhood feature a wide variety of materials. This variety is compatible and acceptable for new residential structures as well. Typically, contributing homes feature a masonry foundation (stone or block) with exterior walls sided in wood, aluminum, fiber, vinyl, or composite materials. Design of the new residential structures is encouraged to follow this pattern.”

Staff is recommending denial of the permit as the new construction material is not a material typically found in the district and the limestone serves as a connection to the historic structure.

Owner's Name: Joe Anderson

Owner's Address: 5100 S. Rogers St., Bloomington, IN 47403

Phone Number / e-mail: (812) 606-8717 email: joe@hoosierheights.com

Instructions to Petitioners:

The petitioner must attend a preliminary meeting with staff of the Department of Housing and Neighborhood Development during which the petitioner will be advised as to the appropriateness of the request and the process of obtaining a Certificate of Appropriateness. The petitioner must file a "complete application" with Housing and Neighborhood Department Staff no later than the Wednesday before a scheduled regular meeting. The Historic Preservation Commission meets the second Thursday of each month at 5:00 P.M. in the McCloskey Room. The petitioner or his designee must attend the scheduled meeting, to answer any questions or supply supporting material. You will be notified of the Commission's decision and a Certificate of Appropriateness will be issued to you. Copies of the Certificate must accompany any building permit application subsequently filed for the work described. If you feel uncertain of the merits of your petition, you also have the right to attend a preliminary hearing, which will allow you to discuss the proposal with the Commission before the hearing during which action is taken. Action on a filing must occur within thirty days of the filing date, unless a preliminary hearing is requested.

Please respond to the following questions and attach additional pages for photographs, drawings, surveys as requested.

A "Complete Application" consists of the following:

1. A legal description of the lot:

Lots: Dixie Highway, Lots 7-12;
Township: Perry Township;
Neighborhood: Perry City
Address: 1008 S. Rogers St.

2. A description of the nature of the proposed modifications or new construction:

This is an application to amend a previously approved COA-16-66, dated: 10-31-2016.
The owner would like to delete the limestone veneer that was shown and approved at the Northeast corner of the proposed, new, metal building. He wants to increase the area of the "Green-wall vertical landscaping" to replace the area of the limestone veneer. See attached drawings. This change is a practical one as a vertical Green-wall Landscape will tend to erode the integrity of the limestone veneer as the root systems attach to the wall.

3. A description of the materials used:

The Green-wall would consist of a steel trellis system set in the landscape that would mask the building elevation in the area shown. The balance of the materials would be the same as the original, approved proposal consisting of dark gray colored, metal siding. See attached drawings.

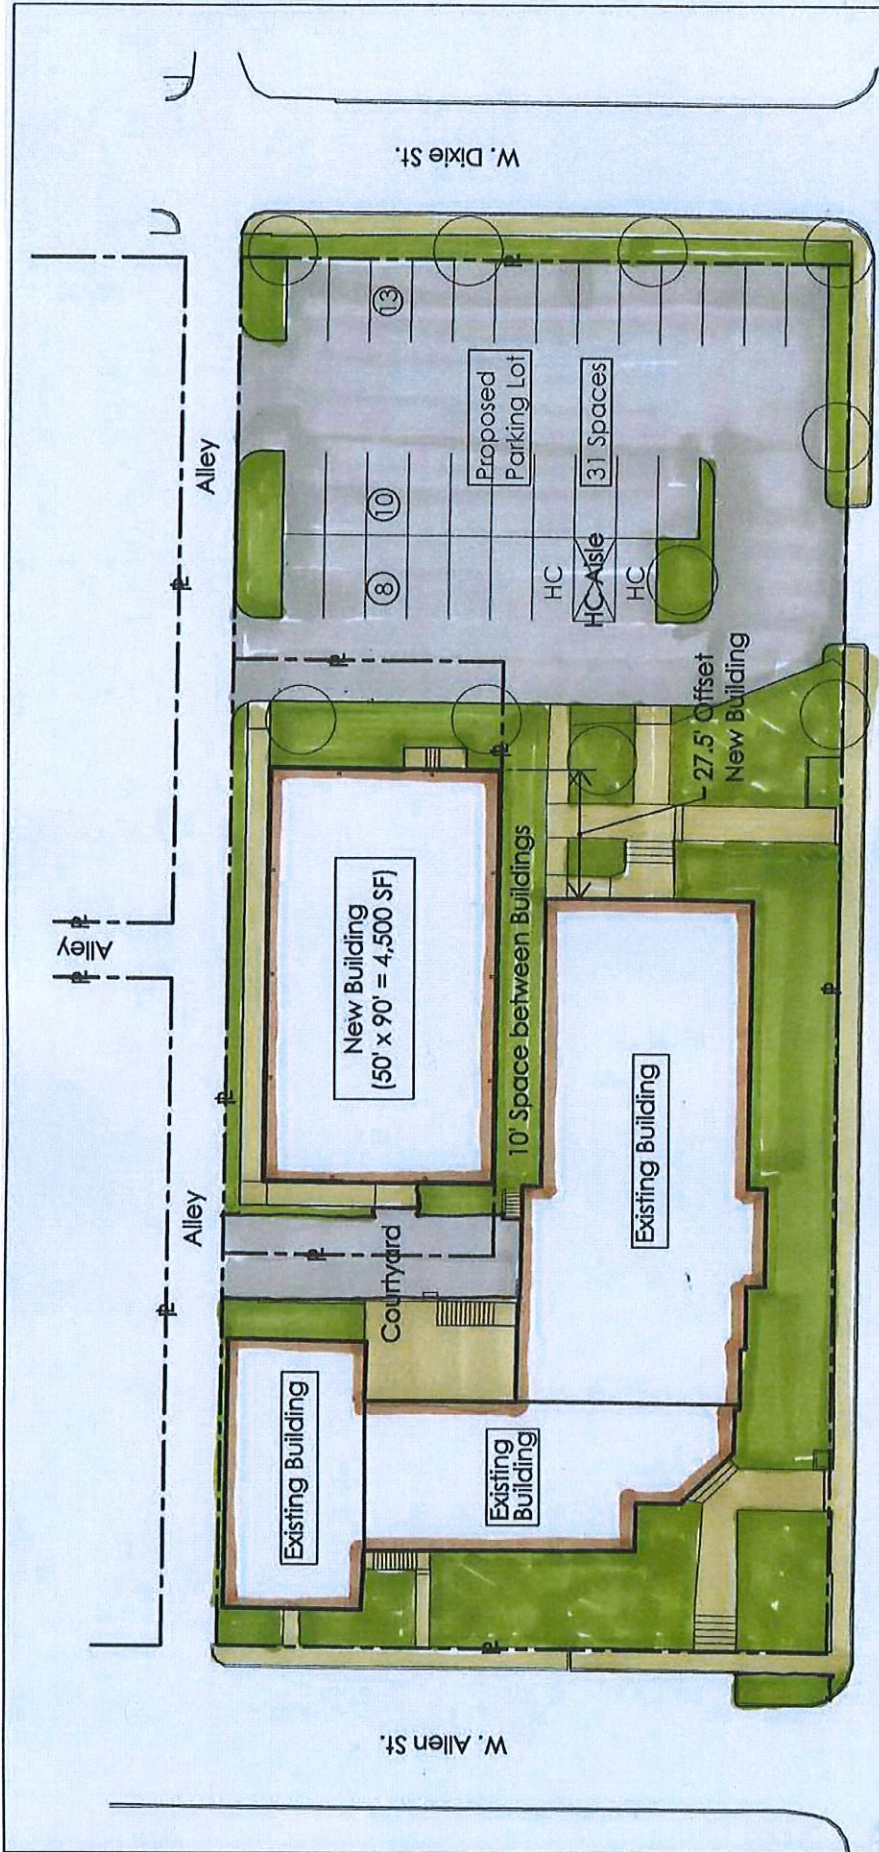

4. Attach a drawing or provide a picture of the proposed modifications. You may use manufacturer's brochures if appropriate.

See attached drawings.

5. Include a scaled drawing, survey or geographic information system map showing the footprint of the existing structure and adjacent thoroughfares, Geographic Information System maps may be provided by staff if requested. Show this document to Planning Department Staff, to ascertain whether variances or zoning actions are required.

6. Affix at least three photographs showing the existing full facade at each street frontage and the area of modification. If this petition is a proposal for construction of an entirely new structure or accessory building, include photographs of adjacent properties taken from the street exposure.

If this application is part of a further submittal to the Board of Zoning Appeals for a Conditional Use or development standard variance, please describe the use proposed and modification to the property which will result.
